Winemaking Kit Ordering Information

Visit <http://www.letsdowine.com/school.html> to order your equipment kit and/or juice kit as soon as possible so that it is in your possession no later than week 4 of class.

1. Click on “Deluxe Equipment Kit”. For students using their own juices, please order the deluxe equipment kit only unless you already have a suitable method to ferment your juice.
2. Check one of the boxes to select the type of secondary fermenter (carboy). Select either the P.E.T. plastic or the Glass option. Please note that the glass carboy will increase the cost of the kit by \$20.
3. After you have made your selection, click the “Add to Cart” button. Click on “Keep Shopping” and you will return to the Deluxe Equipment Kit page.
4. Scroll down that page and click on “Wine Making Juice”. Check one of the two boxes to select your wine juice and then “Add to Cart”. Please select only one juice for class that most closely resembles the type of wine you may want to make at your winery.
5. You can now click on “Check Out” button and complete the shipping information. At the bottom of that page, be sure to enter coupon code **DAC10** to receive your 5% student discount.
6. Click on “Continue” button and fill out billing and credit card information. Press the “Send Order” button and your order will be complete. You will receive an automated email confirming your order.
7. Anytime you order online through the Let’s Do Wine website, you will receive the 5% discount.

If you have any ordering problems, please contact Let’s Do Wine at 716-686-9969 or wendy@letsdowine.com.
